

AEROADVANTAGE

ASSET MANAGEMENT

ProEnergy's asset management team has extensive experience managing contractual, commercial, operational, financial and risk management aspects of a project. We identify opportunities to achieve your strategic goals and enhance the value of power generation assets and asset portfolios.

PROENERGY

ADVANTAGES

- Operational Performance
- Financial Performance
- Risk Management
- Compliance

POSITIONING STATEMENT

ProEnergy's approach to asset management will optimize the levels of service, cost, risk, and performance for each asset. ProEnergy will work with the shareholders to develop appropriate tactical plans to achieve these strategic objectives for the assets.

HOW WE ADD VALUE

Operational Performance

- Achieving operational targets such as start reliability for peaking assets and equipment availability for base loaded assets
- Extensive experience in power generation industry
- On-site and Remote Operations experience

Financial Performance

- Budget development, variance analysis and cost reduction programs focused on achieving owner's strategic objectives
- Reducing overall life cycle cost
- Sub-contractor management
- Commercial and market optimization
- Capital improvement planning
- Tax and insurance management

Risk Management

- Develop and implement commercial risk management policies
- In-house access to elite comprehensive engineering and technical support 24/7
- Global O&M footprint, including experience working in challenging locations
- Materials, Equipment and Spare Parts Management
- Remote Monitoring and Diagnostics
- World class CMMS support

Compliance

- Achieving environmental and safety targets by utilizing refined Environmental, Health and Safety Programs
- Expert NERC compliance programs and support
