

PARTS POOL

MAXIMUM PLANT RELIABILITY AND AVAILABILITY. IN STOCK, GUARANTEED.

A single part can be the difference between zero availability and full productivity. Our industry-first parts pool eliminates supply-chain risk and months-long delays to keep your plants running.

As a member of the PROENERGY parts pool, you receive exclusive access to consumables and critical spares backed by guarantees. The program leverages the collective buying power of more than 100 LM turbines, so you receive the critical parts you need without indefinite lead times or a substantial onsite inventory.

Your membership gets you fixed pricing on a \$200 million inventory, guaranteed in stock and shipped within 24 hours. Available in two tiers focused on your LM technology needs, all parts have the support of our certified field services technicians, engineering teams, and independent Level-IV depot, which offers a 120-day major overhaul guarantee.

TIER 1

Features industry-standard parts for LM2500 and LM6000 platforms—which includes engine and package consumables in addition to controls—to address all your essential needs.

TIER 2

Includes Tier 1 plus specialty and hard-to-source items—such as hot section components and complete assemblies—as well as site-specific customizations to meet your operating requirements.

OPERATE WITH TIME AND MONEY TO SPARE

The PROENERGY parts pool is your guaranteed backup inventory. Available 24/7 whether planned or unplanned outages arise, this unprecedented program enables you to keep fewer parts on hand, spend less capital budget, and pay less on inventory taxes.

WHAT IT INCLUDES

Your customized parts pool includes everything you need from standard spares to hot section components and assemblies. The first tier offers essential turbine and package items; the second allows you to level up your supply with capital spares and custom components.

	Turbine	Package
TIER 1	<ul style="list-style-type: none"> • Check valves • Thermocouples ignition systems • Accelerometers • Actuators • Cables • Pumps 	<ul style="list-style-type: none"> • Vibration system parts • Generator spares • Off-engine cables • Generator lube oil systems • Fuel systems • Turbine lube oil systems
	Capital Spares	Custom
TIER 2	<ul style="list-style-type: none"> • Everything in Tier 1 • HPT Stage 1 blades and nozzles • HPT Stage 2 blades and nozzles • HPT Stage 1 and 2 shrouds • LPT Stage 1 blades and nozzles 	<ul style="list-style-type: none"> • Controls • Starter motors • Valves • Valve drivers • Reduction gear boxes

HOW IT WORKS

- 1** PLACE YOUR ORDER.
- 2** PROENERGY SHIPS YOUR PART WITHIN 24 HOURS.
- 3** RECEIVE YOUR PART.

The process is simple. First, PROENERGY performs an initial in-person audit of your plant equipment, usage history, and current inventory. Next, we help you to define the parts stored on our shelves versus the ones kept at your site.

With a blanket PO in place, you can request a part 24 hours a day, 7 days a week. We will ship the part to you within 24 hours and send you an invoice.
