PROENERGY AWARDED 336MW POWERFLX PROJECT BY WATTBRIDGE

SEDALIA, MO (May 15, 2020) - ProEnergy announced that it has been selected by WattBridge Energy, LLC (WattBridge) for the Topaz Power Station as part of its Path to Power, a 2 GW platform in the ERCOT market. ProEnergy will provide a turnkey power plant solution that will include 7 LM6000PC peaking generation units with a total capacity of 336 MW.

WattBridge is a Houston, Texas based firm responsible for the development and operation of peaker power solutions enabling renewable energy growth. WattBridge has over 1.3 GW of generation planned for 2021.

“ProEnergy supports WattBridge’s commitment to bridging the gap to a responsible and sustainable energy future. Our PowerFLX packages deliver quick start, highly efficient gas-fired aeroderivative turbines at-the-ready to support their renewable power counterparts” said ProEnergy CEO, Jeff Canon.

“Facilities like this enable the growth of renewable wind and solar generation in the electricity market and are a key feature to cost effective and reliable electricity to the ERCOT market. We are pleased to partner with ProEnergy in our commitment to a sustainable energy future” added WattBridge CEO, Mike Alvarado.

ProEnergy is responsible for the construction, management, operations, maintenance and repair services for energy generation facilities and equipment around the world. ProEnergy has U.S. offices in Sedalia, Missouri and Houston, Texas; and international locations in a number of countries including Angola, Argentina, Brazil, Canada, Chile, Mexico and Pakistan. More information is available on ProEnergy’s website at www.proenergyservices.com.
