## **PROENERGY EPC SERVICES COMPLETES TERMOZULIA PROJECT**

ProEnergy EPC Services, a wholly owned subsidiary of ProEnergy Services, has completed the Termozulia project in Maracaibo, Venezuela as scheduled. The power plant, located in the country's second largest city, is a 170 mega watt gas and diesel fired facility.

ProEnergy EPC Services was chosen for the engineering, procurement and construction of the power plant by Enelven, one of the ten state-owned power companies merged under Corpolec, the Venezuelan government entity in charge of electricity. Termozulia will supply Enelven's 400,000 customers with 25% of their power needs. The project began on October 4, 2009.

"This has been a tremendously successful project for many reasons," said ProEnergy Services President Jeff Canon. "We were able to meet an aggressive schedule, came in right on budget and helped meet the need for power in Venezuela."

ProEnergy Services is an integrated service provider that delivers cost-effective, safe and reliable service to the global energy industry. The company has U.S. offices in Sedalia, MO; Houston, TX; Tulsa, OK; Fort Collins, CO; and international locations in Argentina, Mexico, Venezuela, Panama, Brazil, Pakistan and Ghana. More information is available on its website at [www.proenergyservices.com](http://www.proenergyservices.com).
