PROENERGY AWARDED CONTRACT FOR 150 MW COMBINED CYCLE PLANT IN PANAMA

ProEnergy Services has been awarded the contract to supply equipment and provide engineering procurement and construction management services for a Generadora Del Atlantico project in Panama.

Equipment for the 150 MW project will include 2 refurbished 7Bs operating on heavy fuel and 1XGE steam turbine generator. ProEnergy also will provide project management and start-up and commissioning on the \$77.55 million project.

Simple-cycle capabilities are expected to be complete in March 2009, while combined cycle is projected to go online in August 2009.

ProEnergy also has a five-year agreement to operate and maintain the plant. When working on international projects, ProEnergy self-performs complex engineering and construction tasks, while coordinating other work with subcontractors or local workforces through training and consultation.

ProEnergy provides cost-effective, safe and reliable service to the global energy industry. The company has U.S. offices in Sedalia, MO; Atlanta, GA; Houston, TX; Tulsa, OK and overseas locations in Argentina, Mexico, Venezuela, Pakistan, Panama and Ghana. More information is available on its website at www.proenergyservices.com.
